

EDIC-mini Plus A32

Miniature digital audio recorder

*Model with wide range of possibilities, features
3 control buttons and 8 built-in recording profiles!*

Opportunities and advantages

Among competitive advantages of Edic-mini Plus A32 recorder, besides high record quality and autonomy, it should be noted presence of 8 built-in recording profiles allowing configuring recorder according to your needs and 3 control buttons which help quick and comfortable switching between profiles. Model also features timestamp – ability to playback and transfer to PC the specified recording interval. Recordings are saved in WAV format with 4 available compression modes: without compression, u-Law, ADPCM 4-bit, ADPCM 2-bit.

Technical characteristics

- Dimensions: 54x24x11 mm;
- Weight: 12 g ;
- Case: plastic;
- Power supply: rechargeable battery;
- Battery life in record mode: up to 30 hours;
- Battery life in VAS mode: up to 120 hours;
- Battery life in stand-by mode: up to 5 months;
- Built-in flash memory: 2 Gb;
- Interface: USB 1.1;
- Audio recording format: mono;
- Frequency band: 70 — 6000 Hz;
- Dynamic range: -70 dB;
- Sample rate: 4, 8, 16;
- Voice Activating System: YES;
- Timer recording: YES.

Modifications

300HQ (2Gb)

*Last digits in the models' name show
the maximum recording duration in hours
(sampling rate 8kHz, u-Law)*

Delivery set

Voice recorder

USB-SPI cable

Operation
manual

And a lot more:

Recording modes

Circular and linear modes of recording. When the linear mode is on, the duration of the recording is limited by the recorder's memory capacity only. The circular recording mode allows to continue recording when there is no free memory left, in this case the recorder starts recording newer data over the oldest ones.

Data protection

When using password protection, only an authorized user has access to the recorder's data and settings. Every recording made with the audio recorder has a time and date of the beginning of the recording, giving it a digital watermark that allows to detect exactly in which recorder the recording was made and if the recorded file was modified.

Timer recording

Recorder can start recording automatically, for this the recorder has two timers: a once timer (the beginning and end of the recording are to be set) and a daily timer (the time and date of the beginning and end of the recording are to be set).

Voice Activation System

Voice Activation System (VAS) allows to save memory consumption (increasing a real recording's duration) and power consumption. When VAS is on, the recorder does not record pauses, but saves the pauses' durations so after the recordings are uploaded onto a computer the pauses can be restored as silence depending on previous settings.

Control button.

A LED (models A38, B42) provides the indication of the recorder's operating modes.

Connecting to a computer

Connect the recorder to a computer USB port using the shipped USB cable. The supplied software is available for Windows 98/2000/ XP/Vista and Windows 7, 32bit and 64bit. The software allows to save the recorded data as standard audio files, set the recorder's settings, and use the recorder as a flash drive to save files 2-8Gb, depending on the modification. The recorder's firmware can be updated using the recorder's USB interface.

Time marking

Time marking is a new function that allows to print the time of the beginning and the end of the recording on the recorded data. For instance, if you know that the data were recorded between 3 pm and 5 pm, you will find this recording easily. This function is especially useful when your recorder has a big memory capacity.

Optional Accessories

All models can work with the external microphones that improve the recording quality when the recorder is in an acoustically closed place, for instance, in a pocket. Microphones allow to increase low signals and decrease loud ones.
