

# EDIC-mini Tiny S+ E84

## Miniature digital audio recorder

*Model features two external microphones which enable to record in Stereo Mode.*

## Opportunities and advantages

Due to its compact sizes, only 46x14x6 mm, the device can be installed in any undistinguished place with two microphones spaced on different sides of the room. Such system provides the clearest and upscale recorded sound! 4 Gb of built-in memory allows Edic-mini Tiny S+ E84 to record 150 hours. The application of external power supply provides stable continuous audio recording until the recorder's memory is full. Moreover, the option of record in circular mode allows the device to conduct continuous audio recording which makes it an ideal "black box" to reconstruct the sequence of important events of your life!

## Technical characteristics

- Dimensions: 46x14x6 mm;
- Weight: 7 g;
- Case: Metal;
- Power supply: external power supply (3,5-6V);
- Built-in flash memory: 4Gb;
- Interface: USB 2.0;
- Audio recording format : Mono, Stereo;
- Frequency band: 100-10000 Hz;
- Dynamic range: -65 dB;
- Sample rate: 8, 11, 16, 22;
- Voice Activating System: YES;
- Timer recording: YES.

## Modifications

150HQ (4Gb)

*Last digits in the models' name show the maximum recording duration in hours (sampling rate 8kHz, u-Law)*

## Delivery set

Voice recorder

USB adapter

Operation manual

# Edic-mini Tiny + series

Digital records made by the recorders of the Edic-mini Tiny + series are counterfeit proof owing to the custom developed system of markers.

These distinctive marks being unnoticeable for the user go through all the recording stages and help to define the integrity of the recorded voice information. These marks help to identify the recorder's model, its serial number, record start time as well as the attempt to modify it.

This system of markers is more reliable as compared to the previous one. The main difference is that now record's integrity can be checked not only by RecManager, but also by a specific program used in the Ministry of Internal Affairs.

If a record has been modified, the recorder won't identify it as authentic.

This is an important step for broader implementation of digital recording as proof in court enabling to apply the Recorder as an incorruptible witness to record precisely and objectively all the conversations and sounds within a radius of up to 12 meters and save it for any period of time. Besides it won't change evidence as opposed to what some people do.

## Having traditionally small size, the models of Edic-mini Tiny+ series feature the following:

- Recording time up to 150 hours (for 150HQ models);
- System of digital markers: inaudible markers are added to the record allowing it to identify the record's time and date as well as the recorder's type and its serial number; and the attempts to modify it;
- Low power consumption;
- Password protection of records;
- Broad frequency band up to 100-10000 Hz;
- Continuous high-quality audio recording without signal's compression at the distance of up to 12 meters;
- Recording is enabled with Switch, Voice Activation System (VAS), or daily and once timers;
- Linear and circular record modes;
- LED Indication of the recorder's operation.
