

EDIC-mini Tiny+ A88

Miniature digital audio recorder

The high-end voice recorder in a metal case

Opportunities and advantages

Professional voice recorder Edic-mini Tiny+ A88 is the most high-end recorder of this series! It also features tiny dimensions (7×30×46 mm). Despite its small size, the recorder is a professional recording device designed for high-quality audio recording in complicated acoustic environment and from long distance. Ease of use and wide set of features make this recorder applicable for a wide range of tasks.

Technical characteristics

- Dimensions: 7×30×46 mm
- Weight: 12 g
- Case: metal
- Autonomy with battery: 60 hours
- Power supply: Li-Pol 150 mAh rechargeable battery
- Interface: USB 2.0
- Audio recording format: mono
- Frequency band: 100-10000 Hz
- Dynamic range: 75 dB
- Sample rate: 8, 11, 16, 22 kHz
- Voice Activating System: yes
- Timer recording: yes
- Microphone sensitivity: min 35 mV/Pa
- SNR: 72 dB
- Built-in Memory capacity: 8 GB
- Recording time with built-in memory : up to 290 hours at 8kHz, 10bit, μ law
- Distance recording: up to 13 meters in silent room with audio source 85dB.

Operation manual

Edic-mini Tiny + series

Digital records made by the recorders of the Edic-mini Tiny + series are counterfeit proof owing to the custom developed system of markers.

These distinctive marks being unnoticeable for the user go through all the recording stages and help to define the integrity of the recorded voice information. These marks help to identify the recorder's model, its serial number, record start time as well as the attempt to modify it.

This system of markers is more reliable as compared to the previous one. The main difference is that now record's integrity can be checked not only by RecManager, but also by a other specific program (digital signature).

If a record has been modified, the recorder won't identify it as authentic.

This is an important step for broader implementation of digital recording as proof in court enabling to apply the Recorder as an incorruptible witness to record precisely and objectively all the conversations and sounds.

Having traditionally small size, the models of Edic-mini Tiny+ series feature the following:

- System of digital markers: inaudible markers are added to the record allowing it to identify the record's time and date as well as the recorder's type and its serial number; and the attempts to modify it;
- Low power consumption;
- Password protection of records;
- Broad frequency band up to 100-10000 Hz;
- Continuous high-quality audio recording without signal's compression ;
- Recording is enabled with Switch, Voice Activation System (VAS), or daily and once timers;
- Linear (circular) record mode;
- LED Indication of the recorder's operation;
- Multi-language support (English, Russian), Vietnamese is an option.
